

CARVE-OUTS

CREATING VALUE....

3 April 2025

Prof. dr. Hans Vanoorbeek, Vlerick Business School & INSEAD

PERSONAL BACKGROUND

- Academic:
 - Adjunct Professor Entrepreneurship Vlerick (12 years) & Private Equity INSEAD (8 years)
 - PhD on ETA (entrepreneurship through acquisition)
- Professional/practice
 - +25 year PE experience (IK, BC Partners, Alpha, Chequers, Kulczyk)
 - Entrepreneur & investor: Private holding (BV Capital Partners) (4 majority and 2 minority)
- Looked at many carveouts in professional career.....
 - Just finished one.....and looking at others right now....

MATCO: An Introduction

- MATCO is an all-round service & solutions provider to the chemical industry.
- Activities
 - Sourcing & trading of chemicals
 - Valorization of overdue / off-spec chemicals
 - Tailor-made production of adhesives, compounds, blends (also for 3rd parties)
 - Collection & management of (hazardous) chemical waste
 - Logistic services for chemicals
- Sales revenue 2022: € 27 million
- 100% owned by BV Capital Partners
- Located in Waregem (Belgium)
- 18 full-time employees (of which 8 are chemical engineers or chemists)

Crown: A European leader in tailor made latex formulation solutions...

Over 30 years' experience in providing best in class latex compounding services to the industry leaders

Crown produces tailor made latex formulation solutions for flooring and specialty applications

Known for market-leading quality, technical expertise and sustainable innovation

Partner of choice for diversified, loyal customer base of leading industry players

3 manufacturing plants, strategically located close to customers & suppliers

62 FTEs with average tenure of 12 years at Crown

Strong financial profile: FY 23: Revenue €56m⁽¹⁾ & EBITDA €5.6m⁽¹⁾; ~20% EBITDA CAGR and ~80% cash conversion (FY22A 37E)

EXPERIENCE WITH CARVEOUTS

Project Crown

Project Crown – non-core for Synthomer PLC

- Non-core business of Synthomer Plc.
- Synthomer quoted on UK stock exchange
- Turnover 2.83 bn£ and EBITDA 200m£
- Share price reached an all-time low....
- Too much leverage due to previous acquisitions
- Reduction of factories and simplification of business needed....
- Compounding is low level business in a flat market...and has 3 factories....Divestiture via project Crown !
- Synthomer would remain to be the largest supplier (of latex)

Project Crown – Rationale for Matco

- Crown is a larger copy of Matco and does exactly the same ! There are only 3 sizable players in Europe in this area.
- Synergies:
 - Creating the undisputable market leader in flooring chemicals in Europe and the Middle East
 - Geographic coverage (NL v. F) also footprint in Middle East
 - Saving of transport costs for Matco est. €30k p.a. (1000 x 30)
 - Saving of transport costs for Synthomer est. €300k (10,000 x 30)
 - Exchange of know-how, expertise
 - E.g. Synthomer stronger in specialty products....
 - E.g. Matco stronger in alternatives for latex
 - Cheaper latex prices due to large volumes and privileged relationship with Synthomer
 - E.g. 500ton ...est. additional rebate €100/ton
 - Min €50k but more realistically €150k p.a.
- A more detailed calculation of synergies is currently being made....an initial rough estimation of hard synergies could be around €500k

CARVE-OUTS - DEFINITION

- A carve-out is the process by which a company separates a division or subsidiary as a standalone company for financial or strategic reasons and sells it to outside investors....
- Equity carve-out: reorganizing a corporation by creating a subsidiary and offering the public (via IPO) a minority of its stock, while the parent company remains in charge of the company
 - E.g. Signify (Philips), Innomotics/Healtineers (Siemens)
- Spin-off: the parent company transfers shares to existing shareholders as opposed to new ones
 - E.g. GE healthcare, L Brands (Victoria Secret), Imec

CARVE-OUTS - TYPES

CARVE OUTS IN BELGIUM

Ex-oprichter Omega koopt Solvay-product

Umicore enters into exclusive negotiations with Fedrus International for the sale of its Building Products activities

Vemedia, het bedrijf van Yvan Vindevogel, koopt het product Valdispert van Solvay. Vindevogel richtte destijds met Marc Coucke Omega Pharma op. Na een meningsverschil gingen de twee uit elkaar. Sinds 2002 probeert Vindevogel grote broer Omega Pharma het vuur aan de schenen te leggen.

Telecom Italia completes \$24B NetCo sale to KKR

By Anne Morris · Jul 3, 2024 10:50am

- Italian telco has completed the sale its fixed-line grid to KKR-led consortium
- Much-watched transaction will allow TIM to reduce its net debt by \$13.8 billion
- New TIM service company hopes to be able to better compete in cutthroat Italian market

The prosecco corks were no doubt popping at Telecom Italia's (TIM) headquarters in Rome this week after the operator's relieved CEO was able to announce the completion of a long-gestated plan to sell off its fixed-line grid to the Optics BidCo consortium controlled by investment firm KKR.

"The completion of the transaction with KKR and the Italian Ministry of Finance is the result of two and a half years of intense work, during which we have improved the management of TIM and identified industrial and financial solutions that will enable us to meet future challenges," said TIM CEO Pietro Labriola in a statement.

The sale of NetCo for up to €22 billion (U.S. \$23.6 billion) also allows TIM to reduce its net financial debt by about \$13.8 billion, from an adjusted net financial debt of €26.6 billion at March 31, 2024. After leases, net debt stood at €21.4 billion.

MARKET FOR CARVEOUTS IN 2023-24

- Overall deal volume down

PE deal activity

Source: PitchBook • Geography: Europe • As of 30 September 2024

MARKET FOR CARVEOUTS IN 2023-24

- Main reason....

Figure 2: The 525-basis-point rise in interest rates from March 2022 to July 2023 was the sharpest monetary tightening in decades

Central bank interest rates by region (monthly average)

MARKET FOR CARVEOUTS IN 2023-24

- Overall EBITDA multiple down

Global Median EBITDA Multiple, 2005 to 2023

MARKET FOR CARVEOUTS IN 2023-24

- Overall EXITS down

PE exit activity

ADVANTAGES OF CARVEOUTS

- Advantages
 - Improved focus on core activities by divesting non-core
 - Financial proceeds...to reimburse debts or invest in core activities
 - Improving efficiency of mother company (after divestiture of less efficient)
 - Improving valuation of remaining business or by selling independent business
 - Improving flexibility of future strategic decisions (like a sale, merger, JV.....)

DISADVANTAGES OF CARVEOUTS

- Disadvantages
 - Transaction costs (legal, restructuring,...)
 - Operational challenges....being independent from mother company
 - Loss in valuation (maybe loss of synergies, smaller mother)
 - Risk of diversion (less focus on core)
 - Market perception of mother company - communication

MARKET FOR CARVEOUTS IN 2024

- Overall market of exits down (valuations down and cost of debt up) but carve-outs up....
- Industrials (and to a lesser extent PE firms) focus on “optimize existing assets”...
 - Selling off non-core, underperforming or heavily indebted business units
 - To bolster balance sheets or P&L's
- Also PE firms
 - non-core to exit strategy
 - To already return some \$\$\$ to investors
 - E.g. Tencate

MARKET FOR CARVEOUTS IN 2024

- Overall market of exits down (valuations down and cost of debt up)
- Industrials & PE sell non-core assets to:
 - To strategics (have synergies, pay on average 20% more)
 - To PE
 - As stand alone....opportunity to acquire undervalued assets after restructuring and streamlining operations)
 - As part of a buy & build strategy

MARKET FOR CARVEOUTS IN 2023-24 – M&A

- Overall market of divestments up (from historically 2% to 25%)

Global M&A: Divestments vs Non-Divestment Volumes

MARKET FOR CARVEOUTS IN 2023-24 - PE

- Overall market of divestments up

Carveouts PE deal activity

Source: PitchBook • Geography: Europe • As of 30 September 2024

MARKET FOR CARVEOUTS IN 2023-24

- Going to 12% in US and 18% in Europe (as % of total buyouts)

PE sponsors gives divested assets new life

Source: [PitchBook's Annual 2024 US PE Breakdown](#)
As of Dec. 31, 2024

Share of PE carveouts deal value

Source: PitchBook • Geography: Europe • As of 30 September 2024

MARKET FOR CARVEOUTS IN 2023-24

- Differs per sector.....

Divestment deal volume as % of total deal volume (2023)

- Developed sectors experiencing market volatility
 - E.g. Energy: energy transition & new entrants
- Sectors with growth (or buy & build)... more integrating than divesting

Separation transactions by industry and geography (2012-22)*

Source: Eight Advisory

MARKET FOR CARVEOUTS IN 2023-24

- Multiples lower in case of carve-outs

Why lower: risk adjustment due to complexity or in downturn need for corporates to firm up their financial position

MARKET FOR CARVEOUTS IN 2023-24

- Multiples lower in case of carve-outs due to fact that every euro higher or lower in price does **not directly** benefit the negotiator (e.g. M&A manager, division head,...) on behalf of the corporate....
- While in the case of family owned companies or PE companies (via carried) every euro higher or lower in price influences **directly** the wallet of the principal at the other side

QUESTION ?

If you had the choice to purchase a company from

- A. A family**
- B. A Private Equity firm**
- C. A larger corporate**

Which seller would you prefer ?

DIFFERENCES

Main differences:

- focus on price valuation
- professionalism/due diligence level
- financial structure
- complexity
- legal
- speed
- emotions

PRICE & VALUATION FOCUS

- **Family**

- Very high: every \$ lower/higher is a \$ out/in pocket
- ...even the perks
- No deadline to sell

- **Private Equity firm**

- High...carried interest....
- Needs exit (fund raising ?)
- Unless is sale of a non-core asset of PE portfolio company (cheaper than platform multiple/multiple diluting asset)

- **Corporate**

- Headline number (internally communicated)
- Many other criteria: communication, stakeholders (unions, personnel, shareholders,...)
- Timing ...depending on the circumstances...but often short

PROFESSIONALISM / DUE DILIGENCE FOCUS

- **Family**

- Lower....
- Personal interests, creativity,...more due diligence required !

- **Private Equity firm**

- Very high
- Fully prepared for sale....less due diligence needed

- **Corporate**

- Very high (policies for everything...)
- But sometimes orphan...neglected....and standalone issues

FINANCIAL STRUCTURE

- **Family**

- Flexible
- Earnouts, vendor loans, co-investment...

- **Private Equity firm**

- Less Flexible
- No earnouts, no vendor loans, unlikely co-investment

- **Corporate**

- No flexibility (policies)
- Cash is king

COMPLEXITY & LEGAL

- **Family**

- Low (standalone)
- But often underestimated costs due to family nature...
- Normal Reps & warranties, no W&I insurance, SHA if they stay on

- **Private Equity firm**

- Low
- Fully prepared but no reps & warranties, W&I insurance

- **Corporate**

- High...many decision makers (unless M&A team and even then)...depends on the degree of independence pre-closing
- Legal nightmare...Transitional agreements (IT, HR, Finance, Tax,...)...banks, people, dealings with parent post-closing....etc....

SPEED & EMOTIONS

- **Family**

- Slow...
- Emotional roller-coaster...not in a hurry

- **Private Equity firm**

- Fast
- Fully prepared
- Very little emotions

- **Corporate**

- Slow due to complexity and layered (HQ) decision-making process
- Announcement on time
- No emotions ...but politics

PHASES TO SUCCESSFULLY MANAGING CARVEOUTS

1 PEAL - Processes & systems, Employees, Assets & intangibles, Legal & contracts

Roland Berger

BCG's Carve-Out Process

1-2 MONTHS

Program setup

- Define carve-out scope and ambition
- Perform initial carve-out assessment
- Develop carve-out program and blueprint

Carve-out program setup

2-3 MONTHS

Design and planning

- Perform comprehensive carve-out issue identification
- Design interim operating models
- Determine need for transitional and long-term service agreements
- Develop implementation plans
- Develop stranded cost measures

Implementation plans developed

3-6 MONTHS

Execution

- Develop and implement country roll-out plans
- Transfer people, assets, contracts, etc.
- Finalize service agreements and implement delivery capabilities
- Implement interim organization and processes and legal entity setup

Fully implemented interim state

The winning formula: Well-thought-out preparation and rigorous execution

CARVEOUTS...NOT ALWAYS EASY

Companies fail to meet their carve-out targets in the quality, duration and cost dimensions

Quality

Quality targets relate to the standalone operability and performance of the carved-out entity

Duration

Duration targets relate to the duration from the decision to carve out to completion of the deal (closing or Day 1)

Cost

Cost targets relate to the one-time costs, running costs (incl. dyssynergies) and stranded costs associated with the carve-out

CHALLENGES OF CARVE-OUTS

- Seller is not be as focused on supporting the sale. Vendor's attention (resources, cash, people,) is on their core business.
- Seller's own financial position may cause them to rush the sale. Transfer of proceeds is main priority. Seller fails to adequately prepare or accomodate a smooth separation process. This puts the burden onto the buyer.
- Separation documentation is often incomplete and not as comprehensive as it should. Buyer needs to make more assumptions during due diligence.
- Sellers often assume a corporate buyer. They do not adequately prepare the asset for sale to a financial sponsor who need to develop his own views from an outside-in perspective.
- Transitional services delivery is variable. Buyers have less confidence.
- Deal leads and programme leads are stressed - comes on top of normal job. People not always to collaborative. And takes time of focus on core business.

CHALLENGES OF CARVE-OUTS - TSA'S

Most frequent areas of usage of Transitional Service Agreements (TSAs)

Number of transactions with TSA applying to this area

TIPS WHILE NEGOTIATING A CARVE-OUT

- Put focus on the integration and value creation plan early...should be part of the deal logic
- Consider a broader more operationally focused set of due diligence (operations, IT, assets...) - often underinvested !!
- Get the TSA's (Transitional Service Agreements) right
- Technology is key (IT systems, cyber security, systems,...). Outsourcing to third party provider/advisor
- Get as soon as possible stand alone (and get rid of the TSA's and technology of the seller)...define path
- Make thorough analysis of the stand-alone costs (start from clean sheet) – beware of shared services...
- Work with vendor

MARKET FOR CARVEOUTS IN 2023-24

- Multiples lower in case of carve-outs

Why lower: risk adjustment due to complexity or in downturn need for corporates to firm up their financial position

QUESTION ?

Do the returns of corporate carve-outs outperform these of the PE industry in general ?

RETURNS

- No supporting academic data - except Bain, EY studies...
 - Except equity carveouts outperform IPOs and stock market
 - Except positive influence on stock price of the parent
- My gut feeling....higher than other deals

PE entry-level multiple – median EV/EBITDA by industry

One of the biggest advantages of a carve out for an acquirer is that these assets are available at a much cheaper cost compared to a normal M&A transactions where valuations are at premium.

Source: Bocconi

RETURNS...OUTPERFORMANCE ?

- Before 2012...a clear yes: MM of 3x v. 1.8x

Gross multiple on invested capital for global buyouts

— Top quartile ■ Median — Bottom quartile

Pre-2012

2012 onward

Notes: All calculations in US dollars; includes fully and partially realized global buyout deals with equity check sizes greater than \$100 million

Source: DealEdge

- After 2012....mixed answer: top quartile and median MM of carveouts slightly below top quartile and median of overall market

RETURNS...OUTPERFORMANCE ?

- What changed ? Sources of value creation - in particular revenue and margin improvement - have changed/decreased !

Median indexed value creation for carve-outs

Pre-2012

2012 onward

Notes: All calculations in US dollars; includes fully and partially realized global buyout deals with equity check sizes greater than \$100 million

Source: DealEdge

- Main reason: Increased competition has reduced the carve-out discount
 - More competitors and smarter corporate sellers...have pushed up prices..more difficult to realize added value for the sponsor !
 - But caveat: Bain is larger part of the midmarket....

RETURNS - IMPROVEMENT POTENTIAL

- Newco is often benefiting....

Change in profit and loss (P&L) metrics between close and 2-years post-close

P&L metric (as % of revenue)	RemainCo	NewCo
Revenue growth	+0.4%	+4.7%
Change in cost of goods sold	(0.6)%	+0.3%
Change in SG&A	(0.4)%	+0.7%

Source: Company filings, CapIQ and other publicly available information.
 *(P&L metrics reflect median change two years post-close).

RETURNS - SCATTERED (CONFIRMATORY) DATA

- EY study confirms: higher IRR's but also higher variance

According to a study by accounting firm EY, investments in carve-outs offer lower entry multiples for private equity firms when compared to other buyouts, which in turn leads to higher returns on exit. EY analysed the performance of around 700 private equity-backed carve-out deals done between 2015 and 2019 and found that returns from carve-out deals exceeded the average internal rate of return (IRR) of 14.1% delivered by the private equity industry as a whole.

Carve-out deals, however, are not a one-way ticket and do require specific experience on the part of a financial sponsor to execute successfully. Indeed, in its analysis EY noted 'huge variance' in returns across its sample. While most of the deals it looked at delivered IRRs in the 30% to 50% range, some carve-outs did result in negative returns.

RETURNS

Exhibit 1 - Carve-Outs Offer Significant Value, but Performance Varies Widely

Total return (December 31, 2002 = 100)

Spinoff performance after closing (cumulative TSR in %)

Execution is key

Sources: S&P Capital IQ; Refinitiv Datastream; BCG analysis.

Note: The Bloomberg Spin-Off Index tracks US spinoffs for the first three years of their independent operation. For the TSR chart, N = 195 spinoffs completed from 2010 through 2020. TSR = total shareholder return; p.p. = percentage points.

WHAT DO TOP-TIER CARVEOUTS?

- Bain study of 25 carveouts between 2013-2024
- Common denominator: **“Winning sponsors ensure that there is an unbreakable link between the core value creation thesis and how the new company is set up to achieve it !**
- No two step process. Standing up a new company is only half the battle.
 - Underwrite a bulletproof value creation plan (VCP)
 - Marry it to a separation plan, a talent strategy (game-ready executives asap....different environment !) and an execution plan for the VCP’s unique requirements
- E.g. CVC acquired Syntegon (packaging machines) from Bosch...creating a Mittelstand” culture (nimble, entrepreneurship, pride,...)

CARVE OUTS IN AN SME CONTEXT

- Relatively few due to size
 - Do not hesitate to contact PE firm in that case
- Requires more research (not in Annual Report)
- Requires often proactive approach
- Requires more valuation work (shared services, synergies, stand alone costs..)
- Requires ideally access to management

E.g. subsidiary JV from oil giants

E.g. non-core product from petfood giant

e.g. non-core activity from a PE owned chemical company

THE DEAL - PROJECT DELVAUX

Teaser

ACQUISITION OPPORTUNITY

Project « Delvaux »

Strictly Confidential

THE COMPANY

- The transaction concerns transferring the full ownership of the operating activities of the **best known luxury travel brand in Belgium**, including the brand, the customer base and the employees.
- As the company is currently still incorporated in a larger entity, **the seller is open to discuss several scenarios to structure the sale** and is even open to remain a minority shareholder.
- The business unit has **revenues of ~18 MEUR in FY17**, with an **EBIT before allocations of ~1,5 MEUR** for the same period. Forecast 2018 shows a significant increase in revenues and EBIT of which, due to the seasonality of the sales cycle, a large part is already secured.

ACTIVITIES

- As a tour operator, the entity purchases airplane seats, local transport and hotel accommodation from suppliers, combines the above in a package and sells the products under its own heritage brand and with its services through different retail channels to the end customers.
- The entity is able to maintain and increase its profitability through:
 - **Its heritage brand name, loyal customers and specialized dedicated team of 10 FTE's.**
- The seller remains open to discuss a variety of long term operational and commercial service level agreements, such as airplane & hotel contract benefits, IT and back office support.

REAL ESTATE

- Real estate **will not be sold** however it is possible to remain at the current location.

INVESTMENT RATIONALE

- The seller intends to divest the entity due to the distinct mission and strategy of the entity as compared to the overall strategy of the seller.
- On a standalone base, the entity will be able to focus 100% on its core business, providing opportunities to increase sales and operational efficiency.
- The entity's strategic focus on even more luxury holiday offerings will further fuel its profitability

FINANCIAL

P&L €000	FY16	FY17	FC18
Revenue	20 994	17 876	22 250
Direct costs (Hotel, flight...)	(17 487)	(14 276)	(17 707)
Direct contribution margin	3 507	3 599	4 543
Direct contribution margin %	17%	20%	20%
Other revenue	1 066	882	968
Other variable costs	(2 194)	(1 913)	(2 358)
Gross margin	2 380	2 569	3 153
Gross margin % turnover	11%	14%	14%
Pers. Exp.	(667)	(662)	(688)
Mkt. Exp.	(485)	(413)	(520)
IC	-	-	-
Other	-	(17)	(34)
EBIT Before allocations	1 228	1 476	1 911
Own retail result (online-offline)	568	594	771
EBIT after alloc. & elim. own retail	1 795	2 071	2 682
EBIT % turnover	9%	12%	12%

- 2017 was partially affected by the commercial effects of the Brussels Airport bomb attacks.
- According to the reduction of early booking- and last minute discounts and the focus on more luxurious holidays, we observe **an increase of the overall margins.**

Target group 2: settled in life and looking
for an impeccable holiday experience, we
match their way of traveling

We believe that
true luxury is about
freedom and trust.

We take you
from dream
to reality.

More than 30 years of passion for luxury travel.

We have been pioneering in the world of exclusive travel since 1989. A lot has changed now, but just as much has stayed the same. The philosophy and vision on which Pegase was founded thirty years ago, remain the essence of our services to this day. Over the years we have built our reputation as an undisputed source for luxury vacations. In 2024 we can proudly announce that we're the only luxury tour operator in Belgium that has been around for more than thirty years.

Freedom is in our genes

Pegase follows in the footsteps of Pegasus, the majestic winged horse in Greek mythology, who is on an endless exploration for freedom.

Just as Pegasus embodies endless freedom, Pegase stands for the freedom to choose and define what luxury means to you.

Carefree trust.

Pegase as house of luxury travel is a house of trust, and has been a house for more than 30 years.

One brand,
Three labels

The house of luxury travel

Pegase Exclusive

Pegase Tailored

Experience Pegase

In our selected Pegase hotels, your client can fully relax. In the wellness, in the spacious room or on a lounge by the infinity pool. Each Pegase hotel was critically selected by a team of experts and offers luxury, quality and relief. Your customer completes his luxury travel experience with privileges that meet his wishes. Just enjoy.

Experience Pegase Exclusive

The best of the best. With Pegase Exclusive, your client chooses personalised service and the most exclusive hotels, where luxury knows no limits. The cream of the crop. We design your client's holiday according to their wishes and accompany the customer in his travel experience from booking to return home. This way you experience freedom in complete confidence.

Experience Pegase Tailored

From dream to reality. That unique holiday that has been floating around in your client's mind for quite some time? A travel experience your client would love to cross off their list? From exclusive roundtrips and once-in-a-lifetime experiences to multigeneration family trips and bucket list activities... With Pegase Tailored, we turn it into reality according to the client's individual wishes. The client passes on their dreams, we make them come true.

What to expect

Personal

At Pegase, luxury is personal. Our team of Luxury Travel Advisors is always there for our customers and creates a personal total experience from dream to reality.

Privileged

The Pegase privileges allow our customers to complete their luxury travel experience. They choose what luxury means to them and create their package according to their individual wishes.

Partners

Thanks to our sustainable long-term relationships with our travel agents, hoteliers, airlines and local agents, we have all the expertise to plan the customer's dream trip down to the last detail.

Protection

Pegase as a house of luxury travel is a house of trust. In uncertain times, we provide peace of mind and the customer can always count on us no matter what.

Private

We always respect the customer's wishes and look for unique accommodations where they can enjoy VIP treatment in peace and quiet.

The Pegase guarantee

Always a personal service thanks to our Luxury Travel Advisors

Including private airport transfer or parking

Hand and hold luggage always included

Faster through security via the Fast Lane at Brussels Airport

Travel worry-free thanks to our Pegase Protection

The reliability of a licensed Belgian tour operator

Choose between Luxury and Premium Luxury flights

CONCLUSIONS

- Carve-outs is a growing source of deals for private equity (25% of M&A exits, 10-20% of buyouts).....
- You have to find them....Not always (full) auctioned.
- More difficult to analyse (stand-alone, normalizations) and often more complex (legal, HR, TSA's,....)
- But mostly cheaper
- And (most likely) leading to higher IRR's....

By Frits Ahlefeldt

**TO CARVE-OUT OR NOT TO CARVE-OUT...
NO GUTS NO GLORY**
